

# The future of healthcare is here, and it's EPIC!

**As of July 1, Saint Mary's Hospital will be using a new Electronic Health Record called EpiCare.**

Saint Mary's will be joining some of the best hospitals in the country, including Johns Hopkins, Kaiser Permanente, Cleveland Clinic, Mount Sinai Health System and UCLA Health in bringing EpiCare to our physicians and providers, and to you – our patients. We are replacing multiple clinical systems with EpiCare, which will enhance the care we provide.

EpiCare offers many benefits for you and your family:

#### **Safe and Secure**

Your secure online medical record will only be accessible to your doctors and members of your care team and will include information such as:

- Lab and test results
- Allergies to medications
- Past procedures
- Prescription medications
- Health history

#### **Just For You**

MyCare gives you secure access to your medical record on the go! Pair your iPhone with your Apple Watch to view alerts for new information, upcoming appointments, messages and your medication list.

#### **One record**

EpiCare goes with you wherever you go for care:

- Saint Mary's Hospital
- Saint Mary's Emergency Department and Urgent Care Centers
- Saint Mary's blood draw stations
- Franklin Medical Group offices
- Many community physicians who can connect via EpiCare Link
- Other hospitals in our regional network

#### **Better, Safer, Faster**

EpiCare will make it faster and easier for your providers to communicate and enhance the care we provide. Ultimately, it means that you will spend less time waiting so you can get back to what's important to you!

Not everything is changing! All of us at Saint Mary's are committed to providing you with the same high quality care and exceptional service you've come to expect from us. While we are excited to introduce EpiCare, you may experience some initial delays in your care and we ask for your patience during this time.
